

## Profile

A Lead Product Designer with 20+ years' experience and a decade specialising in enterprise trading, analytics and fintech platforms. I stay hands-on, using research combined with data-driven insights to create and test impactful designs for users in capital markets. I partner with stakeholders and engineering to ship complex data workflows across global teams, translating technical requirements into intuitive, user-centric interfaces. I also build design systems from the ground up, driving adoption and consistency across global applications.

## Expertise

- Design systems: building, governing & scaling
- Leading and mentoring design/product teams
- Design vision and strategy for enterprise trading and analytics platforms
- Hands-on design work on complex projects
- Applying AI tools across research, prototyping, design and front-end delivery
- Working directly with senior stakeholders

## Experience

### Key achievements

Apr 22–Jun 26

### Cargill / Lead Product Designer (UI/UX)

Design lead for enterprise trading applications within Cargill's global Ag & Trading business. Partnered with product owners, engineering teams, and business stakeholders to deliver scalable digital solutions that improved operational efficiency and user experience across global platforms. Established a comprehensive design system with guidelines, improving UI consistency across global teams and legacy applications.

- Bespoke design system built and adopted
- Lead product discovery and delivery
- Business-to-product translation
- Set design governance and standards
- Global stakeholder leadership
- Introduced AI-enabled process improvement
- Translated complex trading requirements into user centric workflows

Sept 2021–Apr 22

### bp / Lead Designer UI/UX

Led the creation of an internal analytics hub and the data-visualisation / infographics guidelines governing its dashboards. Owned UI & UX design, requirements gathering and stakeholder management while directing external development and offshore resources to delivery.

- Defined dashboard & data-viz guidelines for an analytics hub
- New bespoke internal product
- User-centered agile methodologies
- Remote project management

Jan 20–Sept 21

### LSEG/Refinitiv / Senior Product Designer

UI product design for Refinitiv Workspace, a flagship financial data and analytics platform used by capital-markets professionals. Created design solutions, built component libraries with usage guidelines, and governed product delivery standards. Agile methods and strategic planning, and conducted workshops. Prototyped designs and presented them to key stakeholders.

- Halo Design System Portal delivered
- Help & Support Application launched
- Design system UI lead & governance
- Offshore product development teams

Sept 19–Jan 20

### Turner & Townsend / Senior Designer (UI/UX)

Designed a bespoke responsive data-service application for cost managers from concept through delivery, working closely with product owners and engineering to streamline complex workflows around a user-centred product.

- Designed a bespoke product for the market
- Implemented Material Design patterns
- Crafted complex data workflow solutions
- Senior stakeholder engagement
